

Rynoh Software Bundle Release Notes

Release: September 2, 2025

New Features

RynohLive Enhancements

Enhanced Security with Mandatory Multi-Factor Authentication (MFA)

To further enhance account protection, RynohLive has removed the option to disable Multi-Factor Authentication (MFA). MFA has already been enabled for all users, and this update ensures it remains active at all times. This change reinforces our commitment to keeping your data secure and your login experience safe.

PDF Display Issue for Adaptor Information Resolved

We've addressed an issue where adaptor PDFs in RynohLive did not display the correct information. PDF files now present adaptor details accurately and consistently.

Escrow Tax – Admin Tab Access Update

Some clients experienced an issue where they were unable to access the Morning Report layout due to restricted permissions on the Admin tab. This has been resolved by updating access controls to better align with report permissions, ensuring consistent access for authorized users.

My Address Book – Contact Addition Access Restored

Some clients encountered a 403 error when attempting to add a new contact in My Address Book due to a permission-related issue. This has been resolved, and users with appropriate access can now add new contacts without interruption.

Intraday Wires – Subscriber Checkbox Updates Now Displayed

Some clients experienced an issue in RynohLive IDW where changes to subscriber checkboxes were not visible after saving. This has been corrected, and checkbox updates now display as expected upon saving.

Bank Account Login – Comment Entry Issue Resolved

Some clients encountered an error when attempting to add comments under the Bank Account Login section in the RynohLive Admin panel. This issue has been addressed, and comments can now be added successfully without receiving an error.
